

NATURAL 26™

Dog Food

Product Description

The higher percentage of protein and fat combined with the meaty flavor of **Natural 26™** provides a great tasting, nutritionally-sound formula targeted for the high energy needs of active and working dogs.

Natural 26™ is one of our most popular products. Pet owners, kennels, and breeders use and recommend it for its nutritional value and great palatability.

Available in 5, 25, and 50-lb bags.

Features and Benefits

26.0% Protein & 12.0% Fat - Formulated for the energy needs of working and active dogs.

Meat Protein is the First Ingredient - Protein comes from meat not grain, resulting in increased palatability and protein quality.

No Soy - Some dogs have sensitivities to soy.

No Chemical Preservatives, Artificial Colors, or Flavors - For a healthier, more natural food.

Chelated Trace Minerals - Chelated minerals are more absorbable during digestion.

Yeast Culture - Aids in a healthy digestive system.

GENERAL OFFICES

Blue Seal Natural 26™ is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for all life stages.

Suggested Feeding Recommendations (*Adjust according to the condition of the dog*):

Body Weight (in lbs.)	Adult Maintenance/Day (in approx. cups*)
5	$\frac{3}{4}$
10	1 $\frac{1}{4}$
15	1 $\frac{1}{2}$
20	2
30	2 $\frac{1}{2}$
50	3 $\frac{1}{4}$
70	4 $\frac{1}{4}$
100+	6+

*A standard 8 oz. measuring cup holds about 3.8 oz. (0.24 lbs.) of **Natural 26™**.

Calorie Content: 1,600 kilocalories per pound = 384 kcal/cup.

If desired, self-feeding of dry dog food may be started at any age. Allowances must be made for the age and activity of the dog. Feed only what the dog will consume in a reasonable period of time. Some dogs, for instance, may be fed free choice if they are working hard. Provide plenty of fresh water.

Avoid dietary upset when introducing your pet to a new food by mixing the new food with the current food. Gradually increase the amount of the new food over the course of one week until you are feeding the new food exclusively.

The suggested feeding program is intended solely as a guide. The variables of management, environment and breed may dictate changes in the animal's requirements.
